TOKIO, June 3-7.30 P. M.—The Governor of Hiroshima Province telegraphs that the earthquake which took place on June 2 killed six people, wounded seventy-nine and destroyed thirty-three houses in Hiroshima and Ujina.

The reports from other affected districts are incomplets, but it is believed that the loss of life and the destruction of property have been comparatively slight.

The first shocks of the earthquake destroyed the telegraph system, which besides making it impossible to communicate with the earthquake district, cut off Tokio from Western Japan and the rest of the world, which created an impression that some great disaster had taken place.

TURNS UP AT CELTIC PARK

The inquiry among all New York Irishmen interested in athletics as to the wherabouts of Thomas Hynes, recently of Ireland, champion cross-country runner of the world, who arrived on the Oceanic Wednesday night, has been answered. He has been limbering up since his arrival.

By some mistake the name of Hynes did not appear on the passenger list of the Oceanic, and a big reception committee that went down the bay to meet him on Wednesday could not locate him. There was no one at the pier to meet the champion, and he had not made arrangements in indvance for accommodations. He went to a hotel for the night, inquired the way to Televite Park the next day, and had been running around the track a couple of hours before he introduced himself to the custodian.

The games of the Galway Men's Association at Ceitte Park, June 11, will mark the first appearance of Hynes in this country. He will compete in the running events against the best men in
